Our Experience

Midwest Safety Counselors, Inc. has been successfully serving clients in the heavy construction and petrochemical industries since 1996. Our qualified staff includes individuals with valuable experience in large refinery outages, industrial hygiene monitoring, field audits, training, and much more.

Through our proactive approach, we typically exceed customer safety performance goals, resulting in decreased exposure to loss and increased profits.

WHY CHOOSE MIDWEST SAFETY COUNSELORS?

Due to the high cost and loss of production associated with turnarounds, it is essential they are executed as efficiently and safely as possible.

Midwest Safety Counselors, Inc. can help your company increase profitability and decrease liability by providing quality safety support services during crucial turnaround and shutdown periods.

We'll work with you to tailor our safety and health services and products to meet your specific needs.

From Contractor Safety Management to Industrial Hygiene monitoring and testing, you can count on our professional staff to help improve safety performance and reduce costs during the turnaround process.
